Technology is a year long exploratory class at HMS that is offered to 8th graders that are not participating in band or the Matrix. Students will learn about different aspects of technology and improve their computer science skills.

**Grading Scale:**  
90-100 = A  
80-89 = B  
70-79 = C  
60-69 = D  
59-0 = F

There is not a textbook for this class, so attendance is extremely important. If you miss class, you are responsible for arranging a time to come in and make up your regular assignments in a timely manner (most assignments will be posted on Google Classroom). Regular assignments MUST be completed in this classroom (you are not allowed to do them at home without special permission). "Daily Activities" can not be made up if absent. If necessary, alternate assignments will be given for students with excessive absences.

### Computer Use:

All students will be assigned a computer to use in class. It is your responsibility to take good care of your computer at all times. If you intentionally damage your computer, you are responsible for any repair or replacement costs. If something is wrong with your computer, report it to me immediately. Do not use/touch the other computers in the room unless instructed to by the teacher.

**Bring to class:**  
Agenda Book  
AR Book  
Pencil/Pen

**Requirements:**  
1 pair of ear buds  
that stay in the  
classroom

**Class Rules/Procedures:**  
Always be respectful  
When you enter the room, be quiet and sit in your seat  
Do not disturb or distract others  
Listen to and follow directions  
Work quietly on your assignments  
If it doesn't belong to you, leave it alone  
No downloading or Internet surfing  
Do not change the computer settings  
Do not touch the computer screen  
No food or drinks  
Sign out of all programs/apps at the end of class

**Curriculum:**  
This year you will be learning a variety of computer science skills that will hopefully better prepare you for high school and beyond. When you leave the class at the end of the year, you should be very familiar with many of the programs available through Google - Docs, Slides, Forms, Gmail, etc. You will spend a large amount of time building your coding skills. You will also be introduced to several technology vocabulary words. If time allows, you will work on other programs available such as iMovie, PowerPoint, and Photoshop.

Students are expected to be on time to class. You will have three minutes between each class to use the restroom, get a drink, or go to your locker. Please take advantage of that time. As a general rule, once you are in my class, you will stay in my class until the bell rings. Do not ask to leave unless it is an emergency.

Please do not touch other people's computers or property without permission. This includes the paper cutter, items on Mr. Boglino's desk and cabinets, and the printer.

**Schedule**  
1st Hour 8:10-9:06  
2nd Hour 9:06-9:49  
3rd Hour 9:49-10:32  
4th Hour 10:32-11:15  
5th Hour 11:15-11:58  
6th Hour 11:58-12:41  
7th Hour 12:41-1:24  
8th Hour 1:24-2:07  
9th Hour 2:07-2:50
